

PROFESSIONAL SUMMARY

Passionate and driven Information Technology undergraduate with hands-on experience in full-stack web development, mobile app development, and AI integrations. Proficient in JavaScript, Java, and web technologies like React.js, Next.js, and Node.js. Demonstrated ability to build and deploy functional applications, including real-time chat systems, ecommerce platforms, and AI-driven tools. Eager to apply problem-solving skills, a strong understanding of software engineering principles, and a commitment to continuous learning in a fast-paced, collaborative internship environment.

EDUCATION

BSc (Hons) in Information Technology

Sri Lanka Institute of Information Technology

June 2023 - Present

Malabe, Sri Lanka

- **Specialized Coursework:** Human Computer Interaction, Information Security and Assurance, Data Science and Analytics, Database Management Systems, Web Technologies
- **Technical Expertise:** Object-Oriented Programming (Java), Modern JavaScript Development, Java/ Python Programming, Data Structures and Algorithms
- **Practical Experience:** Multiple team-based software development projects with industry-standard tools and practices

TECHNICAL PROJECTS & DEVELOPMENT EXPERIENCE

Event Management System – Full-Stack MERN Application

MongoDB, Express.js, React.js, Node.js, Socket.io, JWT, Tailwind CSS, Multer, Redux Toolkit

- Developed a real-time campus event management platform with live announcement broadcasting using Socket.IO
- Implemented smart conflict detection system that automatically checks for overlapping events across campus and warns organizers before submission
- Built JWT-based authentication with role-based access control supporting Participant, Organiser, and Admin roles
- Designed an interactive event calendar with day-click detail view and automatic event status lifecycle management (Pending → Approved → Completed)
- Integrated image upload functionality using Multer for event cover photos with file type and size validation
- Built responsive frontend using React.js, Redux Toolkit, and Tailwind CSS with a mega-dropdown navigation system

Responsive Ecommerce Website – Frontend Web Application

React.js, Tailwind CSS

- Built a fully responsive ecommerce landing page supporting all device sizes with animated scroll effects
- Implemented dark and light mode toggle for an enhanced user experience
- Developed a responsive navbar with dropdown menu and popup modal functionality
- Designed modern responsive product cards and a fully responsive footer using Tailwind CSS

Resource & Booking Management System - Full-Stack Web Application

Java Spring Boot, React.js, MongoDB Atlas, JWT, OAuth2, Tailwind CSS, GitHub Actions

Designed and developed a university facility management platform supporting bookings, maintenance ticketing, and notifications

Built a RESTful Spring Boot API following a layered architecture (Controller → Service → Repository) with role-based access control Implemented JWT-based authentication and Google OAuth2 login using Spring Security for secure, stateless user sessions

Developed scheduling conflict detection using custom MongoDB @Query to prevent overlapping resource bookings

Built a modular React 18 frontend with Tailwind CSS featuring dynamic filtering, modal workflows, and real-time notification badges

Configured a GitHub Actions CI/CD pipeline that automatically compiles, tests, and builds both backend and frontend on every push

Mojito Cocktail Shop – Landing Page with GSAP Animations

React.js, GSAP, Tailwind CSS

- Developed an interactive and visually engaging landing page for a cocktail shop using React.js and Tailwind CSS
- Implemented smooth animations and scroll effects with GSAP to enhance user experience and visual appeal
- Focused on responsive design and modern UI principles to create an intuitive and attractive interface
- Demonstrated front-end creativity and attention to detail in animation and layout design

DocuLens – Web Content Extraction & AI Chat Tool (Ongoing)

MongoDB, Express.js, React.js, Node.js, JWT, Zustand, Gemini API, DASI UI, Tailwind CSS

- Developing a platform to extract and summarize web content and interact with it through AI-powered chat
- Implemented content summarization features using OpenAI API
- Integrated JWT-based authentication and state management with Zustand for efficient user session handling
- Focused on responsive and intuitive frontend design using DASI UI and Tailwind CSS

Web Summarizer Extension – Browser Extension

JavaScript, HTML, CSS, Gemini API

- Built a browser extension that summarizes web page articles into short, bullet, and long formats using Gemini API
- Designed a responsive and intuitive UI for reading and exporting summarized content quickly
- Applied principles of human-computer interaction to improve usability and readability

Chat-GPT Message Store Extension – Browser Extension

JavaScript, HTML, CSS

- Developed a browser extension to store and organize ChatGPT messages in a clean, interactive container
- Implemented a user-friendly interface for easy access and navigation of stored messages
- Focused on usability and smooth UX for efficient message management without any backend storage

TECHNICAL PROFICIENCY

Languages: JavaScript, TypeScript, Java, , HTML, CSS, PHP

Frontend: ReactJS, NextJS, Vite, Tailwind CSS, GSAP, Responsive Design, Component Architecture

Backend: Node.js, Express.js, NestJS, RESTful APIs

Databases: MongoDB, MySQL, Database Design

Tools: VS Code, Git, GitHub, ChatGPT, Android Studio, Figma, Photoshop

Core Concepts: Data Structures & Algorithms, HCI Principles, OOP, Design Patterns, MVC Architecture

KEY STRENGTHS & PROFESSIONAL QUALITIES

- Full-Stack Proficiency across modern tech stacks
- API Integration & RESTful Services
- Database Expertise in design and optimization
- Human-Computer Interaction (HCI) Principles
- Fast Learner adapting to new technologies
- Detail-Oriented with focus on code quality
- Problem-Solving & Critical Thinking
- Self-Motivated continuous improvement
- Team Collaboration and communication
- Best Practices advocate
